Energies

SPAMDA: Software for Pre-processing and Analysis of Meteorological DAta to build datasets

Highlights

- Software for prediction of energy for environmental learning, modelling and conservation.
- Applications in sustainable energy systems: designing offshore structures, operational works, coastal planners.
- It matches and pre-processing data from buoys and reanalysis models.
- Meteorological datasets ready to be used as inputs for Machine Learning techniques.
- It prevents the researchers from performing repetitive and complex technical work.
